"LOUISVILLE"
WROUGHT IRON COTTON-TIE.
PATENTED MARCH 5, 1867, BY
BARRY COLEMAN.
"THE LOUISVILLE TIE"
COMBINES STRENGTH WITH SIMPLICITY.
IT is manufactured of the best charcoal iron,
severe test to insure the quality of the tie.
The hoops are not weakened by being perfor-
ated, or notched, but have the full strength of
the entire width of the iron.
As is shown in the above cut, the tie can be
adjusted in two ways, either of which will hold
the bale to the size it is compressed; and the
dullest laborer can bale cotton either way with
rapidity and ease, without possibly making a
mistake. One end of the hoop in both applica-
tions, is attached to the square side of the slot
in the buckle, the other end of the hoop is pas-
sed through the opening or slot in the buckle,
from either side, and bent around the diagonal
side of the hoop (as in the four hoops), or over
the hoops with the end passed under (as in the
latter manner, the tie can be unbuckled by
pulling the end out with a cotton hook. "The
Louisville Tie" having no lost motion in its ad-
justment holds a bale in compact and good
shape, and protects it from fire, waste and
stealing. It has been thoroughly tested by
planters and cotton presses, and in every case
pronounced to be the best tie yet introduced.
A large stock on hand at lowest rates. Lib-
eral discount to dealers.
BARRY COLEMAN,
(Office Louisville Rolling Mill Co.)
101 Main st., Louisville, Ky.

warded promptly. je20-dwly

IMPORTANT
TO
BANKERS
MERCHANTS,
AND
LAWYERS.
This Company offer for the consideration of
Bankers, Merchants, and those desiring the
best burglar proof security, the following cer-
tificates:
OFFICE OF THE NOVELTY IRON WORKS,
NEW YORK, December, 1866.
Messrs. LEWIS LILLIE & SON:
Gentlemen: We have subjected the sample
of double-chilled iron you furnished us, to the
most severe tests, (as regards drilling through
it,) we could bring to bear upon it, and with-
out success.
It is our opinion that it can be only penetra-
ted by the use of a large number of drills, and
the expenditure of much power with days of
time, and we think it impossible for a burglar
with his time and power to penetrate it all.
Yours truly,
ISAAC V. HOLMES, Superintendent.
LYMAN G. HALL, Foreman.

HINKLEY AND WILLIAMS WORKS,
BOSTON, Mass., March 22, 1867.
We having made an attempt to drill a sam-
ple of double-chilled iron furnished us by
Messrs. Lillie & Son, and failed to penetrate it
more than five-eighths (5/8) of an inch, after
hours of labor, feel that we can endorse the
above Novelty Iron Works' certificate in all
particulars.
J. ARVIS WILLIAMS, Treasurer.
PHILADELPHIA Pa., Feb. 25, 1867.
Messrs. LEWIS LILLIE & SON:
Gentlemen: We have tried a sample of dou-
ble-chilled iron similar to that sent to the No-
velty Iron Works, New York, and our experience
with it is about the same, viz: that it can only
be penetrated by the use of a large number of
drills, and the expenditure of much power with
days of time, and we think it impossible for a
burglar with his time and power to penetrate it
all.
Very truly,
W. H. BECHTEL,
Foreman in Messrs. Merrick & Son's, South-
worth Foundry, Philadelphia, Pa.

CHICAGO, Ill., March 18, 1867.
Messrs. MURRAY & WINNE, Agents Lillie
Safe and Iron Company:
Gentlemen: We have subjected the sample of a
new combination of metals for safes sent us by
you to as thorough tests of the drill as we
could, and failed to penetrate the metal at all.
We think it would be impossible for burglars
to enter the safes made of this metal by means
of the ordinary tools, and we think it probable
that the safes made of this metal by means of
this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made

of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impregnable to the bur-
glar. We think it probable that the safes made
of this metal by means of this process, would be
impregnable to the burglar. We think it proba-
ble that the safes made of this metal by means
of this process, would be impreg
